

Installation Tool - Remote Addressing Device

Doug Fleenor Designs Remote Addressing Device

IN LIVING COLOR

DEALERS' CHOICE AWARD WINNER
WIDGET CATEGORY 2004

The Remote Addressing Device (model RAD) is used to set the DMX address of compatible products. A new enhancement to DMX512 called RDM (for Remote Device Management), allows users to receive status information and set parameters (such as the DMX address) of compliant products using the DMX link. Designed to draft version 2.0 of the RDM specification.

ORDERING INFORMATION

Ordering Number: 65-TST01-001-00

Applications

- Set and change fixture addresses
- Fixtures will identify themselves

Specification sheets are subject to change without notice. For the most recent version, please refer to www.ilight-tech.com.
