

# The iLight News

June 2004

July

## ILIGHT AT AIA SHOW

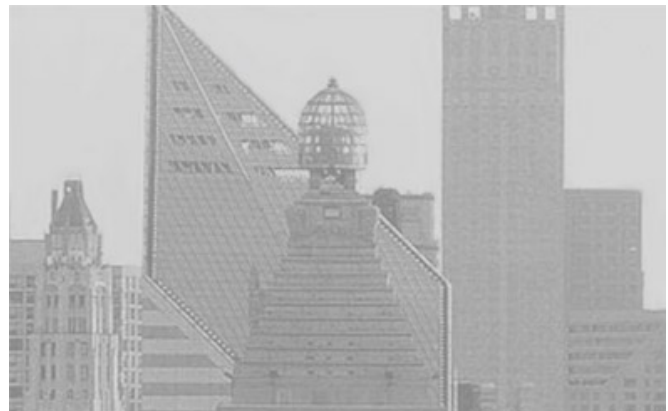

Starting June 10 – 12, The AIA National Convention 2004 comes to the windy city. And since the conference is in our backyard, iLight has to be there.

We've introduced our new Plexineon White Series to lighting designers at Lightfair, and now it's time to give architects a better look at how LED technology has evolved with iLights' Plexineon White & Color Series.

If you are going to the AIA show, please stop by iLight's booth in the "Lighting Pavilion" (Booth # 1491).

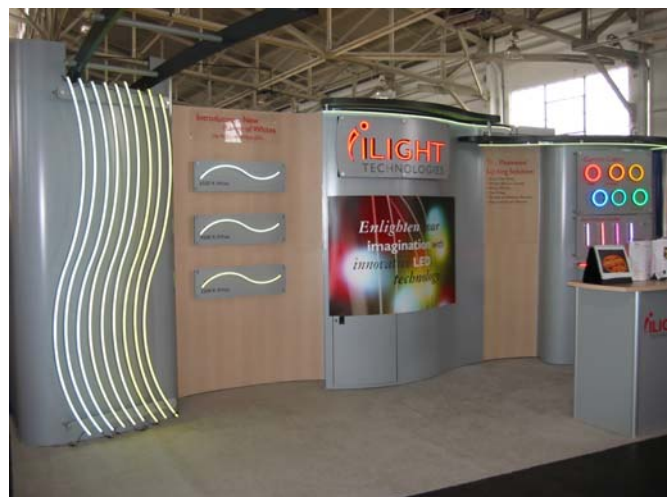

THE AMERICAN INSTITUTE OF ARCHITECTS

## San Fran Lights

From May 20 to the 21, iLight Technologies was one of the exhibitors at **Lighting Systems** (representative in Northern California) **SF Lights** local trade show for high-end specifiers in the San Francisco Bay area. The ability to see and handle the product in person greatly helps designers understand iLight's products and design capabilities.

ILIGHT BOOTH AT SF LIGHTS SHOW IN MAY 2004.

## HIGHLIGHTS OF SUCCESS

Here are a few highlights of upcoming iLight installations:

Plexineon sure caught the eyes of designers, **Tait Towers**, who is helping **Elton John** design his stage set. Plexineon is being used on a 25 foot high star which will be double outlined with red Plexineon. The interior will be lined with 37 angled rows of 6500°K White Plexineon. The star will be on the floor of the stage with a Plexiglas cover under the famous red piano. Nothing like a bright light to make a star look better. The install is going to be in June for Elton John's July shows at Caesar's Palace Coliseum in Las Vegas.

**Gasser Bush of MI** brightened up **Domino's Pizza Corporate Headquarters** with 1000 feet of green Plexineon. The bridge is 500 feet long and connects two corporate buildings. On each side of the bridge is a single accent of green Plexineon. Dominos liked it so much, they are adding Plexineon onto two additional places at their HQ.

6500°K White Plexineon is really adding some pizzazz to newly designed **Morongo, Casino, Hotel and Spa** in Southern California thanks to **White & Associates of LA**. Designers, **Visual Terrain**, selected to accent various interior and exterior locations with 2000 feet of White Plexineon. Installation slated for the end of June.
