

Plexineon® Interior Applications

Cairo Duty Free Shop

Hues of red, green, blue, teal, white and amber Plexineon light up the interior of the Cairo Duty Free Shop in Cairo, Egypt. The six colors of Plexineon accent the curved features of the ceiling to give the building a playful ambiance. The lighting design for this project was done by Carnabah and distributed by The Kanaan Group.

Other products such as florescent, xenon, and neon were considered for the job. However, Plexineon's ability to be custom bent, to mount to the small openings in the ceiling, and retain the original color of the Gypsum drywall made it the preferred product for the job.

Washington Gas Headquarters

Blue Plexineon was used at the Washington Gas Headquarters to compliment the sleek, professional architecture of the building. Gensler incorporated a unique flare by highlighting pillars and stairways to illuminate the building's spacious, open areas.

Plexineon Interior Applications Cont.

Baylor Hospital

The popularity of blue Plexineon used as an ceiling accent has also expanded to the conference rooms, waiting areas, and hallways of Baylor Hospital's *Maxine Messenger Clinic*. The light, whimsical pattern that flows through the hallways and into meeting rooms is mirrored by an identical design on the carpet.

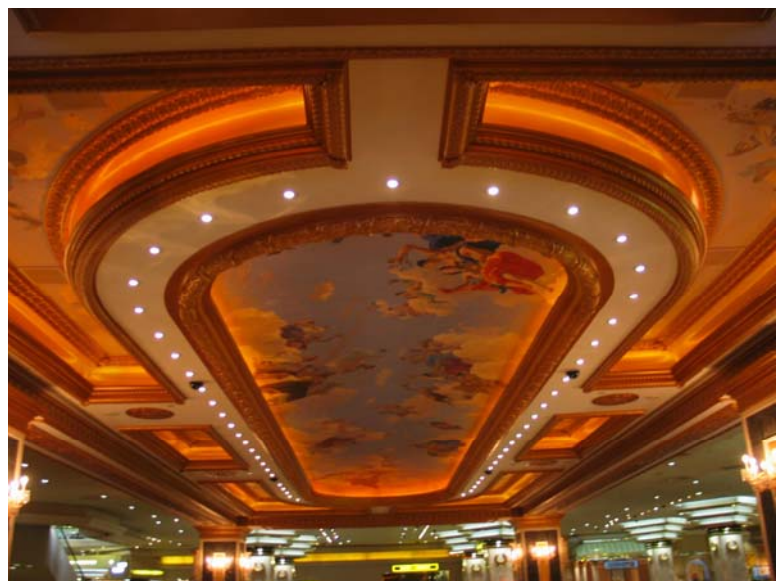

Baylor Hospital had originally considered fiber optics for the design, but Plexineon offered benefits beyond any of its competitors'. Not only is Plexineon brighter than fiber optics, it also emitted a deep, saturated glow, instead of the pale white-blue hue of competitors.

Caesar's Casino

Amber Plexineon brings an entirely different feeling to a room. As seen at Caesar's Casino in Atlantic City, NJ, amber Plexineon creates a warm, comfortable environment where any patron would love to linger. Over 700 feet of amber light transforms the casino into a classy establishment fit for royalty, even Caesar himself.

- **ISA International Sign Expo: April 6-8 in Orlando, FL**
- **Lightfair 2006: May 30-June 1 in Las Vegas, NV**

The attached supplement provides further details on trade shows.

News & Product Updates

NEWS - iLight Sues Tivoli and Fallon for Patent Violation

On March 24, 2006, iLight Technologies filed lawsuits against both **Tivoli Lighting**, a joint venture between Targetti North America and Neo-Neon Holding Company Limited of China, and **Fallon Luminous Corporation** for infringing upon several of its patents related to Plexineon, an award-winning LED lighting technology developed by iLight. Both companies were contacted repeatedly but have continued to infringe on iLight's patents.

PRODUCT UPDATE – New Advance Power Supply Offered

Now there is a new sleeker electronic power supply from Advance that iLight offers with its Plexineon systems.

The new unit offers many new benefits:

- Same price as our current magnetic power supply
- 5 year warranty
- Smaller, sleeker design (Dimensions: 9 ½" X 1 ¼" X 1 ¾")
- Multi-voltage 120-277 VAC

iLight Model # ADV100W24V

Please note, in some circumstances additional equipment/enclosures may be required for this unit.

New Advance power supply is available starting April 3, 2006.
