Case Study: Billy Wilder Theater

Situated in the Hammer Museum in Los Angeles, CA, this elegant and high-tech theater is one of the country's preeminent cinematheques. Michael Maltzan Architecture and Lam Partners Inc. Lighting Design collaborated on the vision for [the Billy Wilder Theater](#) and chose radiating strips of white light to represent the energy and spirit of film.

[iLight's Plexineon White 1X Series](#) was selected for the lighting and designed to create an inspiring, random pattern throughout the theater.

iCan Be [Insert Great Idea]

Be inspired and visit our newly redesigned [Gallery of Applications](#). More than just pretty pictures, see how designers have applied our products in various diverse projects.

With iLight's variety of vibrant colors and temperatures of whites, coupled with any custom bend or length, designers have limitless application options.

Take a moment to [visit our Gallery](#) and peruse through the many application possibilities that iLight offers.

New Product Spotlight: Hypnotica Color Changing Series

Our newest [hypnotizing color changing fixture](#) gives designers a unique way to create mesmerizing color changing environments.

With smooth even color, a small profile, and DMX compatibility, Hypnotica can be used on direct or indirect view applications both indoors and out. This creative RGB fixture creates a wide variety of effects, everything from a subtle, cool feeling to a downright stunning look.
