

## **ILIGHT TECHNOLOGIES PROMOTES RICK GOTTLIEB TO VICE PRESIDENT, ARCHITECTURAL SALES**

**Chicago, IL - January 12, 2009** – iLight Technologies, Inc. ([www.ilight-tech.com](http://www.ilight-tech.com)), a leader in innovative LED lighting solutions, today announced the promotion of Rick Gottlieb to Vice President, Architectural Sales. Mr. Gottlieb will oversee the company's worldwide sales for the architectural channel.

Gottlieb has more than 12 years of architectural industry sales and management experience, including expertise in working with the specification lighting community. He has held key positions with Lucifer Lighting Company and Lutron Electronics.

"iLight's architectural business is poised for strong growth both domestically and internationally. Rick's extensive knowledge and experience in the architectural channel makes him an excellent resource for iLight, its partners, and its customers," states Sean Callahan, President and CEO, iLight Technologies. "We know that Rick will be a key contributor to our worldwide architectural business growth goals."

### **About iLight Technologies, Inc.**

iLight Technologies, Inc. is a leader in innovative LED illumination solutions that transform, excite, and energize corporate identities and architectural environments worldwide. iLight's award-winning products blend the benefits of LEDs with patented application systems that create lighting products that have high brightness with a smooth even glow. The company currently holds fifty-one patents, including one for the Plexineon technology, and has forty-five additional U.S and international patents pending in other LED lighting systems beyond linear lighting. iLight Technologies was founded in 2000, is headquartered in Chicago, IL and manufactures in Cookeville, TN.
