

inspire. transform. energize.

iLight's innovative lighting systems help you transform, excite, and energize architectural environments.

Whether you are looking to inspire, enliven or add a dash of color, our LED lighting systems provide you with versatile linear tools that can be easily customized to fit your project's needs.

iLight's products illuminate evenly, use less energy, and, with its narrow-profile, fit in the most discreet applications. Whether you desire to add a soft glow to an interior cove or paint striking vertical lines of light on a building's facade, iLight's products offer you beautiful accent lighting solutions.
