**ILIGHT TECHNOLOGIES SUES TIVOLI LIGHTING
FOR PATENT INFRINGEMENT**

CHICAGO – March 28, 2006 –

iLight Technologies, Inc. (www.ilight-tech.com) today announced that it has filed a lawsuit against Tivoli Lighting for infringing upon several of its patents related to Plexineon[®], an award winning LED lighting technology developed by iLight in 2000. The complaint was filed in the U.S. District Court on March 24, 2006, alleging patent violations on multiple United States' awarded patents for the Plexineon product.

iLight's manufacturers' representatives have been negatively affected by the actions of Tivoli, a joint venture between Targetti North America and Neo-Neon Holding Company Limited in China, by ignoring iLight's patent rights in the United States and creating a copy of the Plexineon product.

"Many of our sales representative agencies have asked our company to intervene to help protect their ability to sell iLight's Plexineon lighting in their various territories without having to deal with an infringing product," said Susan Larson, President and CEO of iLight. Other iLight customers are confused as well thinking that the Tivoli product is manufactured by iLight.

iLight has previously notified Tivoli and its joint venture owners, Targetti North America, Inc. and Neo-Neon Holding Company Limited, several times and has been disregarded.

“It is iLight’s corporate decision to pursue infringers to the fullest. iLight Technologies has spent a large amount of time and money developing its patented technology and we cannot allow companies to simply copy it,” notes Mark Cleaver, Chairman and co-founder of iLight Technologies.

iLight has also recently taken legal action against Fallon Luminous Corporation for patent infringement, Case No. 2-060025, to enforce its patent rights in the signage market.

Legal Case Summary

Filed in the U.S. District Court for the Middle District of Tennessee

iLight Technologies, Inc. v. Tivoli, LLC of Santa Ana, California, alleging patent infringement of multiple United States awarded patents.

(Case No. 2-060026)

About iLight Technologies
