The Remote Addressing Device (model RAD) is used to set the DMX address of compatible products. A new enhancement to DMX512 called RDM (for Remote Device Management), allows users to receive status information and set parameters (such as the DMX address) of compliant products using the DMX link. Designed to draft version 2.0 of the RDM specification.

The Remote Addressing Device

DMX connection to standard 5-pin XLR Female Adapter for use with RAD unit

Ordering Number: 65-TST01-001-00  RAD
60-W HR01-002-00  XLR5 Adapter
