

Plexineon Dimming Guidelines

PRODUCT SUMMARY

Plexineon is a dimmable product using Pulse Width Modulation (PWM). Here are some guidelines to help you dim the product appropriately:

- Plexineon can be used with simple 0-10V dimmers as well as DMX/RDM dimmer controls.
- Plexineon may only be dimmed on the DC side.
- Note: using magnetic power supplies to dim Plexineon on the AC side will not work.

If you have questions regarding dimming, please contact our customer service team at **312.876.8630** or **support@ilight-tech.com**.
