

The Recessed Mount System for Plexineon

The company's patented Plexineon® product now offers the **Recessed Mount System** to dramatically save time and money for designers and builders embedding Plexineon in a wall or ceiling, while substantially improving the overall consistency of the installation.

Now available to lighting designers, specifiers, architectural firms and contractors, the Recessed Mount System is engineered exclusively for use with the company's successful Plexineon LED technology. The Recessed Mount product is adaptable to a wide range of constructions for easy rough-in installation.

PRODUCT DETAILS

- For use with any Plexineon product
- Flush plaster trim or direct grout finishing for a seamless appearance in drywall
- Snap-in clips allow for easy fixture installation without disturbing surrounding surfaces
- Field cuttable
- Multiple extrusions can be used to create continuous runs with interlocking alignment pins
- Adaptable for drywall, stone, marble, and concrete
- Paint mask is provided to protect the housing interior during construction and wall finishing

INTENDED USE

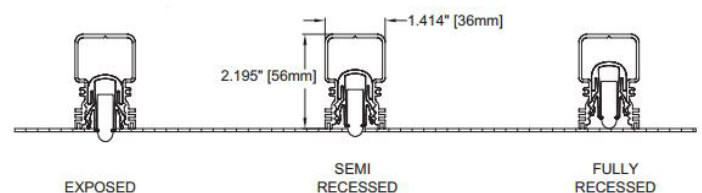

- Ceiling or wall mount
- For straight runs only, not for use with any field or factory bent fixtures

CONSTRUCTION

- Aluminum extrusion with a black anodized finish
- Standard straight 8' (2438mm) length

SELECTABLE FIXTURE POSITIONING

- Plexineon is adjustable from exposed to semi-recessed to fully-recessed (flush) positions
